

In a head-to-head comparison, **Gtech Clean** is over 30 times more durable, requires 90% less product, takes 99% less time to apply and saves an average of over \$870 annually!

## **Gtech vs. Lysol™ Cost Analysis**

	Cost/Liter	Applications/ Year	# Liters needed/Year	Annual Cost	Application Labor	Application Labor/ Cost per Application	Annual Cost for Labor
Gtech	\$21.41	12	2.25	\$48.17	10 minutes	\$1.84	\$22.08
Lysol TM	\$11.90	365	22.8	\$271.32	10 minutes	\$1.84	\$675.25

Lysol<sup>TM</sup> is a quaternary chemical that is combined with other chemicals. Lysol<sup>TM</sup> kills quickly, but has no extended durability profile. As well, Lysol<sup>TM</sup> releases VOC's – the gases that burn eyes, and smell terrible. Furthermore, the chemicals in Lysol<sup>TM</sup> permanently denature microbes which gives them the capacity to evolve to "superbugs"!

Gtech is a technology shown extremely effective against Bacteria, Fungi, Algae, and Virus with a durability profile second to none!
